- Wide and stylish collection
- Maintenance free and sturdy
- Maintains its pose over the years
- Up to 10 year guarantee

Weatherproof CDC EXTERIOR AND BALCONY DOORS

The exterior door is the signature piece of your house. In the Nordic conditions the door must tolerate strong temperature changes, humidity, sun, water and wind. The exterior door must protect you from the cold and maintain its appearance for a long time.

The new and unique aluminum composite surfaced CDC exterior door is the only truly weatherproof door. It is maintenance free and developed to tolerate changes in weather conditions. There is a 10-year guarantee for the door remaining straight. Select from the CDC Collection the best suited exterior door for your needs.

From the CDC Collection you can find the right solution also for the side, back, patio and balcony doors. The stylish CDC door stands tall year after year despite weather changes.

Waterproof composite material

Wood plastic composite material can be used both outdoors and indoors. It does not emit formaldehyde or other unwanted chemical substances. It can be used parallel to wood especially in products and applications that require strong water and humidity resistance.

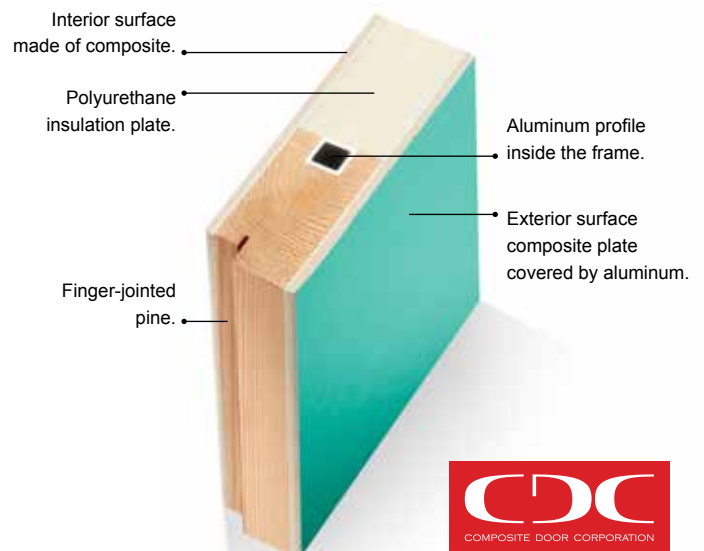

Aluminum surface CDC balcony door

The CDC balcony door is fully covered by aluminum on the outside. The door has polyurethane as thermal insulation and the interior surface is made of composite. The door has double or triple glass element with Argon gas between glasses. The door's thermal U value is <1,0. The door is available in all standard sizes and glass sizes.

Strength against bend and twist

The CDC door includes aluminum plates both as humidity seals and surface material. The door's interior structure is made of finger-jointed pine and contains additional vertical aluminum stabilizers providing extra strength against bending. The CDC door has been tested for example in the harsh weather conditions of Norway where the door was found superior. The CDC doors are available in multiples of colors and with glass style fitting to preferences.

Product quality and guarantee

The CDC door is the only truly weatherproof door available for the Nordic market. Finnish manufacturer Composite Door Corporation CDC guarantees that its doors are faultless regarding material and workmanship. The general guarantee period against possible material and manufacturing defects is 2 years. The guarantee for the door remaining straight is 10 years.
